

All,

Using our Main Street lights as a cost guide, my best guess is that it will cost about \$23-\$24 or less in electricity per month to power these 12 lights (about \$1.98/per month per light) The 92, 100 watt lights along Main Street and along Broadway cost an average of about \$318 per month. A little over half are powered down (dimmed) to 0% all the time.

In comparison, PSO charges us 2.69 per light per month, maintenance included, for the standard street light you normally see around town

Still to come.....what do other cities do?
