PROJECT NUMBERS 195410 & 195409**

SCOPE OF SERVICES

The following scope of services shall be made a part of the AGREEMENT dated the _____ day of _____, 2019.

1.0 PROJECT UNDERSTANDING

The Verdigris River Water Treatment Plant has been in operation since 2014. The OWNER has expressed a desire for CONSULTANT to provide engineering services to address issues related to the following two items:

- 1.1 Raw Water Pump Station (RWPS) Air Conditioning System Replacement. The two existing wall-mounted air conditioners (PAC-1001 and PAC-1002) at the RWPS have proven to be maintenance-intensive and have not provided adequate cooling in the station when needed during summer months. The two units will be replaced with one (or two) new split air conditioner systems with exterior, pad-mounted condensers and interior coil units. The existing wall-mounted units and ductwork will be demolished. A new elevated concrete pad above the 100-year flood elevation will be installed for the outdoor condensing unit(s) and the electrical feed to the new unit(s) will be modified as required.
- 1.2 Sodium Hypochlorite Generator Supply Water Chillers. The three existing sodium hypochlorite generators (GEN-4001, GEN-4002, and GEN-4003) have experienced overheating issues during summer months when the softened water supply to the units exceeds 75 to 80 deg F. To provide cooled, softened water supply to the units, three water chillers will be installed. These units will be designed to reduce the inlet softened water temperature from a maximum of 90 deg F to a range of 55 to 78 deg F. These units will be installed on at-grade concrete pads located on the north side of the Membrane Building. A new electrical panelboard will be installed (fed from panelboard MH-4) to provide 480 VAC, 3-phase power to each unit.

2.0 SCOPE OF SERVICES

CONSULTANT will provide the following services for each of the items described above. The items will be designed, bid, and constructed as two separate projects.

2.1 Design Services

2.1.1 Develop Draft Drawings and Specifications to an 80% level of completion.

2.1.2 Submit the Draft documents to OWNER for review. Address written

comments from OWNER and conduct a conference call to discuss City concerns or to clarify comments.

- 2.1.3 Prepare Final Drawings and Specifications and submit an electronic PDF to OWNER along with an Opinion of Probable Construction Cost (OPCC).
- 2.1.4 OWNER will prepare the front end documents for bidding the project (Division 0). CONSULTANT will assist the OWNER with specific project information such as project description, construction duration, bid proposal items, etc.
- 2.2 Bidding Services. OWNER, without assistance from CONSULTANT, will advertise the project for bids, issue the documents to potential bidders, conduct a pre-bid conference, receive bidder inquiries, conduct the bid opening, tabulate the bids, and award the construction contract. CONSULTANT will provide only specific, limited services, to include the following:
 - 2.2.1 Issue up to two (2) addenda to provide responses to bidder inquiries.
 - 2.2.2 After the bid date, modify the Drawings and Specifications to incorporate the addenda and submit Issued for Construction Drawings and Specifications to OWNER in electronic PDF format.
- 2.3 Construction Services. OWNER will manage the project during construction. CONSULTANT will provide only specific, limited services, to include the following:
 - 2.3.1 Review shop drawings for submittals for equipment, appurtenances, and electrical-related components and provide written review comments to OWNER.
 - 2.3.2 Provide responses to OWNER for Contractor Requests for Information (RFIs) as needed.
 - 2.3.3 Conduct a Substantial Completion site visit (one CONSULTANT employee). Provide a written punch list of items to OWNER that need to be completed by the Contractor prior to OWNER accepting the project.
 - 2.3.4 After project completion, produce Record Drawings using the Contractor's as-built drawings provided by OWNER. Submit an electronic PDF of the Record Drawings to OWNER.
