**Description:** The resident at 1304 El Paso contacted the city about some erosion on her property that was affecting her fence. City Staff investigated and found that the erosion was from runoff from the City owned Park Grove Cemetery. The runoff caused extensive erosion along a channel on the rear of the property. The erosion also was threatening several utilities in the channel. City crews regraded the channel, utilities were moved by the utility company, and City crews armored and sodded the channel. The original cost estimate was for a contractor to conduct the work. City crews completed the work saving the City \$24,240.25.

See Page 2 for photographs.

**Recommendation:** Close the project and transfer the remaining funds back to the Haikey Creek Basin fund.
