

Jasper/Olive/Yazoo/Garnett (Section 8-17-14)

Level 2 designations are given to undeveloped, non floodplain lands in the western half of the section based on the anticipation of sanitary sewer service becoming available at some point in the future. A Level 1 designation is given to existing residential tracts in the eastern half of the section based on the intensity of existing development and based on the likely hood that this area will not develop at more intense levels than those allowed by Level 1 in the future.
