RE: Fire Station #8 - Construction Noise Variance

Mr. Kohl,

Myers-Cherry Construction (MCC) respectfully requests a variance to the noise ordinance quiet hours of 10:00 p.m. to 7:00 a.m. for planned concrete placement activities at Fire Station #8 located at 4103 E Omaha St Broken Arrow, OK 74012.

During the summer months, larger concrete placements must begin in the early morning hours to provide adequate time for placement, finishing, and curing before daytime temperatures rise. To accommodate these conditions and ensure the quality and integrity of the work, MCC anticipates three to four occasions when concrete placement activities may need to begin as early as 2:00 a.m.

We appreciate your consideration of this request and are committed to minimizing disruption to the surrounding area whenever these activities occur.

Sincerely,

Brian Cherry
Managing Member
