

Kenosha/Olive/Houston/Garnett (Section 8-18-14)

A Level 6 designation is given to the existing I-1 zoning and possible expansion east to a floodplain buffer in the northeastern quarter section. Level 4 designations are given for the northeast, northwest and southwest corners consistent with the LUIS model. Level 3 designations are proposed for the northwest and southwest corners as a buffer between Level 4 and Level 2 areas. The Level 3 area in the southwest quarter section is reflective of the existing assisted living center. The remainder of the section is designated a Level 2 based on existing development and the LUIS model.
