We the undersigned are ~~against the~~ relief requests of the development of PUD-290.

We believe the requests are unreasonable, and the city created these requirements for a reason.

Therefore, in no particular order these are our concerns.

1) The request for the removal of the screening fence on the Northeast side is of particular concern.

This will further reduce the privacy of the neighbors on the Northeast side. It will also allow for an increase of trespassing on the golf course, in the creek, and on their neighbors property.

It will also increase safety concerns by allowing kids direct access to the creek.

2) The requests for a reduction in the required parking spaces will create an overcrowding of the parking area in PUD-290, and will cause residents to park elsewhere, most likely in the sports complex

3) The request for a removal of the internal setbacks and structure requirements will result in a development that is and will look crowded. It will reduce the internal for the residents and pets reducing the livability of the complex.

4) We the undersigned also believe the issues of increased traffic drainage, noise, and impact to the sports complex have not been adequately addressed.

We the undersigned do hereby protest the development of PUD290. To our knowledge the developer developed this plan without input from the community. Our issues described below have not been addressed. We believe the area can be better utilized as a housing development or as an addition to the sports complex. We believe PUD-290 will be detrimental to its neighbors & the neighborhood. PUD-290 will increase traffic, property values will go down, residents will park in the sports complex, drainage issues & flooding will increase, and we and our neighbors will lose some of the peace we love and one of the reasons we moved here.
