1.2 Underground Service

1.2.1 Overhead poles may be located along the northerly and easterly perimeter of the subdivision as necessary if located in utility easements for the purpose of the supply of underground service. Street light poles or standards may be served by underground cable, and except as provided in the immediately preceding sentence, all electric and communication supply lines shall be located underground, in the easement-ways reserved for general utility services and streets, shown on the attached plat. The owner does hereby restrict the utility easements shown and designated on the accompanying plat to a single supplier of electrical service.

1.2.2 All supply lines in the subdivision including electric, telephone, cable television and gas lines shall be located underground in the easements reserved for general utility services and streets shown on the plat of the subdivision. Service pedestals and transformers, as sources of supply at secondary voltages, may also be located in said easements.

1.2.3 Underground service cables and gas service lines to all structures which may be located on all lots in the subdivision may be run from the nearest gas main, service pedestal or transformer to the point of usage determined by the location and construction of such structure as may be located upon each said lot: provided that upon the installation of such a service cable or gas service line to a particular structure, the supplier of service shall thereafter be deemed to have a definitive, permanent, and effective right-of-way easement on said lot, covering a five-foot strip extending 2.5 feet on each side of such service cable or line, extending from the service pedestal, transformer or gas main to the service entrance on the structure or a point of metering.

1.2.5 The owner of each lot in the subdivision shall be responsible for the protection of the underground electric facilities located on his property and shall prevent the alteration of grade or any construction activity which may interfere with said electric, telephone, cable television or gas facilities. The supplier of service will be responsible for ordinary maintenance of underground facilities, but the owner of each lot in the subdivision will pay for damage or relocation of such facilities caused or necessitated by acts of such owner or his agents or contractors. The foregoing covenants concerning underground facilities shall be enforceable by the supplier of electric, telephone, cable television or gas service.

1.3.3 The City of Broken Arrow, Oklahoma, or its successors, shall be responsible for ordinary maintenance of public water and sewer mains, but the owner shall pay for damage or relocation of such facilities caused or necessitated by acts of the owner, his agents or contractors.

The lot shall receive and drain, in an unobstructed manner, the storm and surface waters from drainage areas of higher elevation and from public streets and easements. The lot owner shall not construct or permit to be constructed any fencing or other obstructions which would impair the drainage of storm and surface waters over and across the lot. The foregoing covenants set forth in this paragraph 1.4 shall be enforceable by any affected lot owner and by the City of Broken Arrow, Oklahoma.

1.5 Paving and Landscaping Within Easements

The owner of the lot shall be responsible for repair of damage to the landscaping and paving occasioned by the necessary installation of, or maintenance to, the underground water, sewer, storm water, gas, communication, cable television, or electric facilities within the easements depicted on the accompanying plat, provided however, that the City of Broken Arrow or the supplier of the utility service shall use reasonable care in the performance of such activities.
