Re: FY 2018 Pretreatment Annual Report to DEQ  
RMUA/Haikey Creek WWTP  
OPDES Permit Number OK0034363

Dear Mrs. Schroeder:

The RMUA/Haikey Creek WWTP Industrial Pretreatment Program Annual Report for the period October 1, 2017 through September 30, 2018 is hereby submitted. Please note the following general comments in addition to the required forms:

**Report of Changes to the Approved Pretreatment Program**

There have been no changes made or requested to the RMUA/Haikey Creek WWTP approved Industrial Pretreatment Program.

A technically based local limit study is in progress and will be submitted to DEQ by May 31, 2019. I have attached our sampling plan for you to review in Section 7: Water Quality Based Effluent Concentrations.

**Industrial User Wastewater Survey**

The IU Wastewater Survey is continually updated in Tulsa and Broken Arrow. In Tulsa, the Industrial Waste Survey database is updated monthly by Pretreatment staff reviewing the monthly report of new commercial and industrial utility account customers and conducting inspections of those facilities.

No new permits were added to the City of Tulsa Industrial Pretreatment Program during FY 2018. All records pertaining to City of Tulsa's survey are kept at the Tulsa Pretreatment office. Please let me know if you would like to look at the files and I can arrange to have them present at the next Pretreatment Compliance Inspection.

In Broken Arrow, all new non-residential utility customers are given a one-page short survey to fill out before they can obtain water service. The surveys are then forwarded to the pretreatment office and inspections are performed as needed. A comprehensive IU Survey is performed every 5 years and will be initiated again in 2021.

# REGIONAL METROPOLITAN UTILITY AUTHORITY

Tulsa, Oklahoma 74103

One new permit was added to the City of Broken Arrow Industrial Pretreatment Program as a result of the survey during this pretreatment year. Comgraphx/Communication Graphics was issued a City of Broken Arrow Wastewater Discharge Permit in February 2018. All records pertaining to the IU survey are kept at the pretreatment office for your review.

## Report on Pass Through, Upset and/or Interference

Regarding Influent and Effluent priority pollutant scans, all parameters were below both maximum allowable headworks loadings (MAHL) and Oklahoma Water Quality Criteria.

There have been no instances of pass through, upset or interference resulting in OPDES permit violations known or suspected to have been caused by industrial users at any of the POTW covered under the RMUA/Haikey Creek WWTP Industrial Pretreatment Program.

## Report on Other Administrative Activities

During the October 2017 to September 2018 Pretreatment year one industrial user was published as significantly non-compliant (SNC), Comgraphx/Communication Graphics. On Thursday, October 11, 2018, a publication was made in the Tulsa World listing Comgraphx/Communication Graphics as being a "Significantly Violating Industrial User." The first self-monitoring report and laboratory analysis were received and reviewed on February 2, 2018 for Comgraphx/Communication Graphics. The report revealed a silver result of 4.70 mg/L which is a violation of the permitted limit of 0.5 mg/L.

Comgraphx submitted a 24-hour notification form to the Pretreatment Office that listed an improperly sized silver recovery system as the cause of the violation and subsequently called the Pretreatment Office to report that the system had been upsized. Comgraphx was asked to perform a retest within 30 days. The retest, performed on February 14, 2018, revealed a silver result of 1.65 mg/L. Comgraphx called the Pretreatment Office to report that the silver recovery system had been upsized a second time, and again was asked to retest. The two laboratory results from March were progressively lower than the initial sample, but still above City of Broken Arrow local limits. The City of Broken Arrow asked Comgraphx to discontinue discharge from the silver recovery unit.

An initial sample taken from the other process, the Screen Room, revealed silver below the permitted limit at 0.0118 mg/L. However, subsequent self-monitoring at the Screen Room revealed a silver violation. Permit sampling locations were modified to separate the laboratory analysis at the two waste streams. Pretreatment staff performed laboratory analysis at each process waste stream during the yearly inspection. No violations were revealed on the laboratory analysis reports. However, Comgraphx has been asked to modify standard operating procedures to ensure continued compliance.

Comgraphx submitted a 24-hour notification to the City of Broken Arrow Pretreatment Office for each violation. The City of Broken Arrow has remained in constant contact with the facility Maintenance Manager, Jeff Brunner. Comgraphx was issued two written notices of violation. Please see the violation documentation in Section 4: Significantly Non-Compliant Industrial Users.

**REGIONAL METROPOLITAN UTILITY AUTHORITY**

\*\*\*\*\*

175 E. 2<sup>ND</sup> Street 14-117

Tulsa, Oklahoma 74103

Southwest Regional Medical Center was issued a notice of violation (NOV) for incomplete compliance monitoring reports during FY 2018. The first NOV was verbal, per the City of Tulsa enforcement response plan, and the second was a written notice with a \$250 fine. Please see the documentation in Section 3: Non-Compliant Industrial Users.

During FY 2018, Unifirst was issued surcharges in the amount of \$25,535.72 for biochemical oxygen demand (BOD), total suspended solids (TSS), and oil & grease results above residential thresholds per Broken Arrow Municipal Code Manual of Fees. This amount is down from the FY 2017 total of \$50,371.88. Documentation on monthly surcharge amounts is attached for your review in Section 3: Non-Compliant Industrial Users.

The charges are as follows:

- BOD above 250 mg/L = \$0.50/pound
- TSS above 250 mg/L = \$0.16/pound
- Oil & grease above 100 mg/L = \$0.16/pound

**Pollution Prevention**

Both City of Tulsa and City of Broken Arrow place a high value on pollution prevention. Please read the following list of activities for FY 2018:

I. City of Tulsa

Below is a brief summary of Pollution Prevention (P2) activities of the City of Tulsa. The information contained herein covers the Oct. 1 2017-September 30 2018. The City of Tulsa P2 group maintains four full time employees.

A. Pharmaceutical/Medication Disposal

To protect our source water from improper disposal of medications we organize medication take back events and promote the use of permanent drop off locations. Working with other area groups, we held two events. We collected 1679 pounds of medications in total.

We continue to work with the City of Tulsa Stormwater, COOTs, the Metropolitan Environmental Trust (the MET), Tulsa County Medical Society, Tulsa Health Department, Tulsa County Social Services, and CAPSAT to promote the 4 permanent medication drop-off boxes, maintained by the Oklahoma Board of Narcotics and Dangerous Drugs.

B. Dental Mercury Amalgam

The P2 group continues to promote the application of the Best Management Practices (BMP) for Amalgam Waste developed by the American Dental Association. These BMPs, as well as the use of amalgam separators, are encouraged during dental facility inspections, which are conducted pursuant to the P2 group's Silver BMP program. As of July 14, 2017, the new Dental Amalgam Regulation was handed down. We will be sending letters to all the dentists in Tulsa detailing this regulation and the requirements that each office will have to

# REGIONAL METROPOLITAN UTILITY AUTHORITY

\*\*\*\*\*

175 E. 2<sup>ND</sup> Street 14-117

Tulsa, Oklahoma 74103

meet. In the past year, staff surveyed/ visited with 71 dental facilities about their amalgam use and educated them about proper amalgam disposal.

## C. Best Management Practice Programs

A majority of our work continues to be in the maintenance and further development of our BMP programs; which, are designed to reach large industry groups using a cost-effective, low burden, proactive approach beneficial for both the regulator and business. The following is a summary of current programs:

1. X-ray & Photo Processors – 91 total participants; 190- Digital Lifetime PACE participants
2. Printers - 4 participants
3. Individual, industry written - 5 participants
4. Food Handling Facilities - 301 participants
5. Mobile Food Vendor- 63 participants

### *Silver BMP Program*

Most facilities continue to switch from wet processes to digital, we have spent less time visiting digital facilities as they are “Lifetime” PACE members do not require a BMP any more. We still want to recognize those who implemented P2 process substitution with the Lifetime membership. We are continually updating our database to keep up with changing addresses, retirees, new offices, and closings. During the reporting year, P2 personnel made 56 surveys/ office visits to silver facilities, and 48 other contacts such as faxes, phone calls, mailings, and emails for the purpose of promoting and encouraging BMP participation and renewal.

### *Printer BMP Program*

3 surveys/ office visits were conducted at printing facilities this year. There was 1 email/ phone call to printing facilities.

### *FOG BMP Program*

The Fats, Oils, and Grease BMP program is the area that still demands most of our attention. The program continues to disseminate out BMP information to the food-handling industry with positive results. We increased communication and outreach with food handling establishments (FHEs). Staff performed 1365 BMP surveys, and over 619 other contacts, such as follow ups, office visits, investigations, faxes, phone calls, mailings, and emails. Currently, 15% of the City’s 2501 FHEs (-non-regulated/not in business) are participating in the BMP program.

In 2017-2018, we took the following enforcement action on food handling facilities: 7 Notices of Violations and 3 Administrative Orders; and assessed \$175 in fines and \$366 in cost recovery.

# REGIONAL METROPOLITAN UTILITY AUTHORITY

\*\*\*\*\*

175 E. 2<sup>ND</sup> Street 14-117

Tulsa, Oklahoma 74103

We did not conduct a FOG workshop for 2017-2018. We gave FOG BMP training onsite at 1 food handling establishments. During the reporting year, 40 individuals attended FOG BMP training.

### *Mobile Food Vendor BMP Program*

All mobile food vendors receive BMP information when applying/renewing for their City of Tulsa business license. Any vendors that discharge wastewater within the City have to have a wastewater disposal plan approved in order to receive their business license. We approved/renewed 66 MFV's plans. The vendors are inspected along with other food handling establishments included in the FOG program.

### *Advertising/ Outreach*

This was the seventh year the P2 program received an advertising budget of approximately \$39,500, which is used to continue the "Trap the Grease" campaign promoting FOG issues to residents. The reporting year's projects include:

- Ran previous year's billboard and bus shelter ads
- Running TV and radio ads on local stations
- An after-Thanksgiving fryer oil collection event
- Distributing Fat Trappers, can toppers, brochures and flyers
- Promoting our Drug Take Back events (2/year)

Other public education events include: FOG information at all Stormwater Quality public education events, Earth Day, Home and Garden Show, Mobile City Hall, booth at Enviro Expo/Guthrie Green for the National Community Planning Month.

## D. PACE

The City of Tulsa's Partners for a Clean Environment (PACE) program is still the main incentive for P2 participation. All BMP participants receive website recognition when updated and a pledge and decal for display.

As a whole, the City of Tulsa's P2 activities continue to thrive. The vast P2 database and overall network is growing and we are becoming even more effective in our efforts. Our database is being streamlined as updated information becomes available. Present members in our BMP programs are continuing to participate, and new members are being added as more contacts are made. We are in the process of implementing the new Dental Amalgam Regulation, and we now use the Lucity software to track FOG producing businesses as well as grease related SSOs (this is a work in progress).

## II. City of Broken Arrow

Below is a brief summary of Pollution Prevention (P2) activities of the City of Broken Arrow. The information contained herein covers the Oct. 1 2017-September 30 2018. The City of Broken Arrow maintains one part-time employee for pollution prevention.

## REGIONAL METROPOLITAN UTILITY AUTHORITY

\*\*\*\*\*

175 E. 2<sup>ND</sup> Street 14-117

Tulsa, Oklahoma 74103

- City of Broken Arrow conducts commercial inspections 3 days per week. Food handling establishments are inspected twice per year and the automotive shops and car washes once per year. The inspector checks grease/sand interceptors and oil/water separators for proper maintenance, looks at maintenance manifests, speaks with management about best management practices, and inspects waste oil recycle areas.
- Broken Arrow MET Recycle Center yearly totals: Antifreeze recycled = 860 gal; Cooking oil recycled = 998 gal; Motor oil recycled = 8,450 gal
- City of Broken Arrow cooking oil recycle station (located @ Reasor's) yearly total = 626 gal
- City Pretreatment staff participated in the 2018 Mayor's Challenge for Water Conservation which lasted the whole month of April. Mayor Thurmond joined mayors across the nation in asking residents to be more water-wise by making a pledge to change daily habits and perform easy tasks at home to save money, conserve water and energy, and promote water quality in local watersheds. Pretreatment staff visited 35 private schools and daycare centers and spoke to management about the impact that water conservation has on water quality. Earth Day activity books were distributed for each student. Staff also set up a booth at the Farmer's Market and visited local charities, technical schools and universities handing out water quality brochures and 5-minute shower timers. The challenge was a wonderful opportunity for Pretreatment staff to speak to the public about water quality and pollution prevention in the home. Broken Arrow did an outstanding job in the challenge, coming in 18<sup>th</sup> out of more than 1000 cities in our population category.

This concludes the report summary; the complete report is attached. Thank you for your continued support. If you have any questions, please contact me at (918) 259-7000 ext. 7220 or [lwilson@brokenarrowok.gov](mailto:lwilson@brokenarrowok.gov).

Re: Violation of Sewer Use Ordinance; Title 11-C, Chapter 12, City of Tulsa Code of Revised Ordinances

**Notice of Violation**

Dear Mr. Berens:

Southwestern Regional Medical Center has been found to be in violation of the provisions of Section 1205 of the Sewer Use Ordinance and Section III of the facility's Industrial Wastewater Discharge Permit # 5975. Specifically, Southwestern Regional Medical Center is non-compliant for failing to complete a required compliance report in a complete and timely manner.

Section III of the permit stipulates that the deadline for the submittal of a required semi-annual compliance report is the last day of the months of February and August. However, the compliance report due August 31, 2018, was not received in this office in a completed form until October 5, 2018.

Report Incomplete or Needing Correction				
Report			Number of Days Late	Failure Rate
Submitted	Due Date	Complete Date		
6/1/2018	8/31/2018	10/5/2018	35	3rd time in the last 2 years

Please note that failure to submit compliance reports in a timely manner is also a violation of Federal Law 40 CFR Part 403.12 and continued violations by Southwestern Regional Medical Center could result in some combination of the following additional enforcement actions:

Due to the significance of this violation the following enforcement action is hereby imposed:

- The assessment of a **fine of \$250.00.**

Southwestern Regional Medical Center  
October 10, 2018

- The submittal of a written response detailing the likely cause of this violation and a description of the corrective actions taken in order to demonstrate consistent compliance regarding the violations outlined in this Notice of Violation.

Proper payment totaling **\$250.00 (payable to the City of Tulsa)** and the **written response** are to be submitted, **within fifteen (15) days** following receipt of this notice, to the following address:

Industrial Pretreatment  
Attention: Pretreatment Manager  
4818 South Elwood Avenue  
Tulsa, OK 74107-8129

Failure to comply with this notice, as well as continued violations, may result in some combination of the following enforcement actions:

- Disconnection from the sanitary sewer and/or water service, and the assessment against Southwestern Regional Medical Center of all expenses incurred in such disconnection and/or reconnection,
- Revocation of Southwestern Regional Medical Center's Industrial Wastewater Discharge Permit; and,
- The issuance of penalties in amounts not to exceed \$1,000.00, plus costs, for each violation. Each day of non-compliance may constitute a separate instance of violation.

Pursuant to the procedures set forth in Section 1209 (D) of the aforementioned Ordinance, persons desiring to dispute this action must file a written request for reconsideration to the address listed above within fifteen (15) days following the receipt of this notice. The aforementioned Ordinance Title 11-C, Chapter 12 can be found at the website link / address below:

[https://library.municode.com/ok/tulsa/codes/code\\_of\\_ordinances?nodeId=CD\\_ORD\\_TIT11-CWASE\\_CH12SEUS](https://library.municode.com/ok/tulsa/codes/code_of_ordinances?nodeId=CD_ORD_TIT11-CWASE_CH12SEUS)

Please contact Robert Doughty at (918) 591-4383 or Bren Summerlin at (918) 591-4393, if you have any questions or concerns.

Sincerely,

Jo Brown, Manager  
Water Quality Assurance

URGENT     FOR REVIEW     PLEASE COMMENT     PLEASE REPLY     PLEASE RECYCLE

NOTES/COMMENTS:

Description of event: - Minor excess silver in wastewater discharge

Duration of event: Recent monitoring test

Date/Time of event: 5/2/2018

Impact on compliance: minor

Suspected Cause: Solid waste separation tank (grease trap) has had silver embedded in walls and is leaching small amount into system. We have had 0 silver from recovery system sent into wastewater drain in the past 2 months.

Prevention:

We have had drains power washed to remove embedded sediment and had trap pumped to remove particulates from the power wash procedure. Silvery recovery system will remain isolated from main drain system.

Re: NOTICE OF VIOLATION OF CITY OF BROKEN ARROW WASTEWATER DISCHARGE PERMIT # BA 027

Dear Mr. Brunner,

Enclosed is a notice of violation (NOV) of Wastewater Discharge Permit # BA 027 for the Comgraphx facility located at 1765 N. Juniper. The quarterly compliance monitoring report that was received by Comgraphx and submitted to the Broken Arrow Pretreatment Office on May 2, 2018 revealed a silver result of 0.89 mg/L for the sample taken on April 19, 2018. The requirement for 24-hour notification was fulfilled and a form submitted to my office on May 3, 2018 listing silver accumulation in the solid waste separation unit as the cause of the violation. A \$50 fine is required by the City of Broken Arrow Pretreatment Program Enforcement Response Plan. This fine is hereby waived because of the good faith efforts Comgraphx displaying in resolving non-compliance.

There is currently no discharge from the silver recovery unit, so a retest was taken in the screen room for silver on 5/4/18 to determine where the excess silver originated. The sample that was performed revealed a silver result of 0.0118 mg/L. Please note that all future samples from this location must be 24-hour composite samples in order to be used for compliance purposes. As discussed, please continue to sample from this location for regular permit sampling until discharge has resumed from the silver recovery unit. You indicated to me that you were seeking advice on how to remove any built-up silver from the solid waste separation unit. Please keep me updated on the status of this project. Comgraphx is hereby required to sample monthly from the screen room until compliance can be determined.

Please sign the notice of violation and return it to the Pretreatment Office at the address listed below within 5 days. Should you have any questions or concerns regarding this correspondence, do not hesitate to contact me at (918) 259-7000 ext. 7220.

Sincerely,

Re: NOTICE OF VIOLATION OF CITY OF BROKEN ARROW WASTEWATER DISCHARGE PERMIT # BA 027

Dear Mr. Brunner,

Enclosed is a notice of violation (NOV) of Wastewater Discharge Permit # BA 027 for the Comgraphx facility located at 1765 N. Juniper. The quarterly compliance monitoring report that was submitted to the Broken Arrow Pretreatment Office revealed a silver result of 4.70 mg/L for the sample taken on January 26, 2018. You fulfilled the requirement of notifying the City within 24 hours by submitting written notification on February 2, 2018. Your written notification listed an inappropriately sized silver recovery system as the cause of the violation. On February 6, 2018, you notified me in writing that the silver recovery system had been upsized and indicated that you would like to operate the system for a week before sampling again. On February 14, 2018, another sample was analyzed that revealed a silver result of 1.65 mg/L which is also a violation of Permit #BA 027. On February 22, you notified me by telephone that the silver recovery system had once again been upsized.

Because the two silver analyses have exceeded the EPA's technical review criteria of: (permit limit x 1.2) you will need to perform additional monitoring for silver to ensure that Comgraphx is not "Significantly Non-Compliant" and therefore required to be published as such in the Tulsa World. I have attached documentation that describes the process of calculating significant non-compliance for your review. Please analyze sample location 001 five additional times in March to ensure compliance. If the silver recovery unit that you have in place at this time is adequate, and brings the silver result below the permitted limit, which is 0.5 mg/L, taking five 24-hour composite samples will bring the technical review criteria violations to 28% which is below the 33% criteria. Please prepare a monitoring report for the additional laboratory analyses.

Also attached is a form for your response to the violation. Please sign the enclosed forms, describe the suspected cause of the violation and any abatement efforts, and return to the City of Broken Arrow Pretreatment Office within five days. Should you have any questions or concerns regarding this correspondence, do not hesitate to contact me at (918) 259-7000 ext. 7220.
