

Albany/209th/Kenosha/County Line (Section 6-18-15)

A Level 4 designation is proposed for the southwest corner based on existing zoning and adjacent lower intensity land uses to the north, east and south. A Level 4 designation is also proposed for the south half of the southeast quarter section. Another small area for Level 4 is designated at the northwest corner based on existing zoning and land uses. The Level 3 designation is used to reflect existing land uses such as the Camino Villa mobile home park and an existing apartment development, including the nearby church, according to the LUIS model. The remainder of the section is proposed to be designated a Level 2 based on existing development. No access to the proposed South Loop is anticipated along Albany so therefore no Level 3 or 4 designations are proposed for the northeast corner.
