Re:

FY 2019 Annual Pretreatment Program Report to DEQ

Regional Metropolitan Utility Autjority (RMUA)
Industrial Pretreatment Program for:

Haikey Creek Wastewater Treatment Plant
Oklahoma Pollutant Discharge Elimination System

(OPDES) Permit Number OK0034363

Dear Mrs. Schroeder:

The RMUA/Haikey Creek WWTP Industrial Pretreatment Program Annual Report for the period October 1, 2018 through September 30, 2019 is hereby submitted. Please note the following general comments in addition to the required forms:

#### Report of Changes to the Approved Pretreatment Program

No changes have been made to the Regional Metropolitan Utility Authority Industrial Pretreatment Program. Technically based local limits have been calculated and will be submitted as a separate attachment for your approval.

The City of Broken Arrow is in the process of revising the sewer use ordinance to update the following areas:

- Enforcement response plan for commercial users
- Revised technically based local limits for industrial users
- Waste hauler permitting
- Prohibitions on dental amalgam and hazardous pharmaceuticals.

A copy of the draft ordinance will be submitted to you as a substantial pretreatment program modification.

#### Industrial User Wastewater Survey

The IU Wastewater Survey is continually updated in Tulsa and Broken Arrow. In Tulsa, the Industrial Waste Survey database is updated monthly by Pretreatment staff reviewing the monthly report of new commercial and industrial utility account customers and conducting inspections of those facilities.

All records pertaining to City of Tulsa's survey are kept at the Tulsa Pretreatment office. Please let me know if you would like to look at the files and I can arrange to have them present at the next Pretreatment Compliance Inspection.

In Broken Arrow, all new non-residential utility customers are given a one-page short survey to fill out before they can obtain water service. The surveys are then forwarded to the pretreatment office and inspections are performed as needed. A comprehensive IU Survey is performed every 5 years and will be initiated again in 2021.

#### Report on Pass Through, Upset and/or Interference

Regarding Influent and Effluent priority pollutant scans, all parameters were below both maximum allowable headworks loadings (MAHL) and Oklahoma Water Quality Criteria.

#### REGIONAL METROPOLITAN UTILITY AUTHORITY

175 E. 2<sup>ND</sup> Street 14-117

Tulsa, Oklahoma 74103

There have been no instances of pass through, upset or interference resulting in OPDES permit violations that were known or suspected to have been caused by industrial users at any of the POTW covered under the RMUA/Haikey Creek WWTP Industrial Pretreatment Program.

#### Report on Other Administrative Activities

During the October 2018 to September 2019 Pretreatment year one industrial user was published as significantly non-compliant (SNC), Comgraphx/Communication Graphics. A publication was made in the Tulsa World on October 25 listing Comgraphx/Communication Graphics as being a "Significantly Violating Industrial User." I have attached the affidavit of publication in Section 5 for your review. I have also attached the notice of violation that was issued by City of Broken Arrow in Section 4.

The control authority sample for Comgraphx came back with a silver violation at their oil water separator. Two subsequent samples have also come back with silver violations. Comgraphx has been collecting samples "end of process" from their screen room and when the City collected a sample from the oil water separator, a silver violation was discovered. Comgraphx has continued to perform monthly sampling from the screen room with no violations. Comgraphx indicated that the oil water separator may be leaching silver. They were directed, last year, to begin hauling wastewater from their silver recovery unit offsite and have had no flow going into the oil water separator from that process. The City of Broken Arrow is in the process of drafting a consent order for Comgraphx asking them to remove the oil water separator and come into permit compliance. I will forward you the details of that order as soon as it is complete.

During FY 2019, Unifirst was issued surcharges in the amount of \$15,543.28 and Comgraphx was issued surcharges in the amount of \$1,108.28 for biochemical oxygen demand (BOD), total suspended solids (TSS), and oil & grease results above residential thresholds per Broken Arrow Municipal Code Manual of Fees.

The charges are as follows:

BOD above 250 mg/L = \$0.50/pound TSS above 250 mg/L = \$0.16/pound Oil & grease above 100 mg/L = \$0.16/pound

City of Broken Arrow mailed one-time compliance reports to dental dischargers in January. We will be visiting each facility before the July 2020 deadline to ensure compliance with 40 CFR 441.

#### **Pollution Prevention**

Both City of Tulsa and City of Broken Arrow place a high value on pollution prevention. Please read the following list of activities for FY 2019:

#### City of Tulsa

Below is a brief summary of Pollution Prevention (P2) activities of the City of Tulsa. The information contained herein covers the Oct. 1-2018-September 30-2019. The City of Tulsa P2 group maintains four full time employees.

- Tulsa MET Recycle Centers combined yearly totals: Antifreeze recycled = 550 gal; Cooking oil recycled = 1017 gal; Motor oil recycled = 5.715 gal
- Tulsa FOG BMP program staff performed surveys, office visits, and investigations. Tulsa's Partners for a Clean Environment, PACE, program provides website recognition, pledges and decals for display to FHEs who participate and are in good-standing with Tulsa BMP requirements.
- Tulsa FOG Workshop for FHE Employees was held.
- Tulsa Pretreatment staff require all mobile food vendors to have a wastewater disposal plan approved in order to receive their business license. The vendors are inspected yearly.
- Tulsa pretreatment staff attended Earth Day events, Environmental Expo, Sustainable Tulsa meeting, Cox Conserves
   Exposition Fair at the Cox headquarters.
- Tulsa pretreatment staff operate a pharmaceutical/medical disposal program, a dental mercury amalgam program, a silver BMP program and a radiator BMP program.

City of Broken Arrow

Below is a brief summary of Pollution Prevention (P2) activities of the City of Broken Arrow. The information contained herein covers the Oct. 1 2018-September 30 2019. The City of Broken Arrow currently has one employee for the Pretreatment Programs.

The City of Broken Arrow places a high value on pollution prevention. Please read the following list of activities for FY 2019:

- City of Broken Arrow conducted 321 food handling establishment inspections and 66 automotive inspections during FY 2019. The inspector checks grease/sand interceptors and oil/water separators for proper maintenance, looks at maintenance manifests, speaks with management about best management practices, and inspects waste oil recycle areas
- City of Broken Arrow mails letters to residents upstream from sanitary sewer overflows that were caused by grease and
  "flushable" wipes. The letters encourage pollution prevention in the home by telling residents what items they should not
  put in a drain or flush. The letters also inform residents of the City's backflow preventer requirement.
- Broken Arrow MET Recycle Center Cooking oil recycled = 922 gal
- City Pretreatment staff participated in the 2019 Mayor's Challenge for Water Conservation which lasted the entire month of April. Broken Arrow's Mayor Thurmond joined mayors across the nation in asking residents to be more water-wise by making a pledge to change daily habits and perform easy tasks at home to save money, conserve water and energy, and promote water quality in local watersheds. Pretreatment staff hosted a booth at the Farmer's Market every Saturday in April where water conservation/water quality brochures and 4 rain barrels were given away. Water Conservation activity books were distributed to Broken Arrow, Bixby, and Union Elementary Students in the Broken Arrow City Limits. Staff also gave a presentation about water conservation to the 2nd grade students at Country Lane Elementary. The challenge was a wonderful opportunity for Pretreatment staff to speak to the public about water quality and pollution prevention in the home. Broken Arrow did an outstanding job in the challenge, coming in 12th out of more than 1000 cities in our population category.

This concludes the report summary; the complete report is attached. Thank you for your guidance and support of the RMUA Pretreatment Program. If you have any questions, please contact me at (918) 259-7000 ext. 7220 or <a href="mailto:lkimbrough@brokenarrowok.gov">lkimbrough@brokenarrowok.gov</a>.

Jeff Brunner Maintenance Manager Comgraphx 1765 N. Juniper Ave. Broken Arrow, OK 74012

Re: NOTICE OF VIOLATION AND SIGNIFICANT NON-COMPLIANCE

Dear Mr. Brunner,

This letter is in response to the notification sent by Comgraphx on 5/28/19 informing the City of Broken Arrow Pretreatment Office that the monthly laboratory analysis for April was not performed. The Broken Arrow Wastewater Discharge Permit No. BA 027, issued to Comgraphx, requires laboratory analysis to be performed each month. Parameters and frequencies for this laboratory analysis can be found on pages 7-9 of the permit.

Compliance monitoring reports are due to the City of Broken Arrow Pretreatment Office by the 15<sup>th</sup> of the month and should include: the complete laboratory analysis for each monitoring location, a compliance monitoring report signed by the permit authorized signatory, and quarterly waste hauling records for monitoring locations that were not discharged.

Failure to perform self-monitoring as required by the permit is a significant violation as defined in 40 CFR 403.8(f) (2) (viii) A-H. City of Broken Arrow is required to publish an annual list of all industrial users of the public sanitary sewer system who significantly violated a federal, state, or local pretreatment standard during the previous 12-month period. In order to satisfy this requirement, publications are made in the Tulsa World during the month of October. I have attached an example of the publication for you. Please do not hesitate to contact me if you have any questions, concerns or if I can assist you in permit compliance.

Sincerely

Lauren Wilson

PUBLIC NOTICE OF SIGNIFICANTLY VIOLATING INDUSTRIAL USERS

Regional Metropolitan Utility Authority/Haikey Creek Sanitary Sewer Service Area

Federal laws 40CFR, Part 25 and Part 403.8(f)(2) (vili) require that a municipality designated as a control authority publish an annual list all industrial users of the public sanitary sewer system who significantly violated any federal, state or local pretreatment standard during the previous twelve (12) month period. Therefore, the City of Broken Arrow is required to publish the following list of industrial users who have been determined to be significant violators as defined by 40 CFR, Part 403.8(f)(2) (vili): (vili):

Note: Influent and effluent samples should be collected considering flow detention time through the POTW \*VALUES BELOW DETECTION LEVEL ARE CALCULATED AS 1/2 THE VALUE\*

Note: Only table II, VI, and V values that are above MDL will be recorded
BDL Not detected above MDL
MDL Method Detection Limit
MDL Region 6 Minimum Quantification Level (Analytical MDL should meet this criteria so that data can be used for Local Limit assessments and OPDES application data.)
