I. Development Concept

The applicant wishes to allow a tenant to use a portion of the existing subject facility for the processing of high quality edible medical marijuana and be able to grow medical marijuana. PUD-297 will also forbid any medical marijuana retail sales (dispensary). This PUD also will assure that the existing compound pharmacy use, and the existing office space be permitted to remain.

It is the goal of this PUD to add the use of medical marijuana processing and commercial growing / cultivation, and maintain the existing uses. The restriction of outside storage, and signage will allow the processing and growing without those uses being visually apparent from the casual observer.

The existing site and building are not proposed to be modified. Therefore PUD-297 seeks to codify the existing parking space count to remain as it now exists regardless of use.

This PUD will have several positive aspects including providing several additional jobs in the area.

811 W. New Orleans PUD-297
